

Contacts : alerte en cas de doublon d'adresse email (v16) et fusionner les doublons

Alerte doublon d'adresse email

Le module OCA [partner_email_duplicate_warn](#) affiche un message d'alerte quand on encode un nouveau contact avec la même adresse email qu'un contact existant (qu'il soit archivé ou actif).

The screenshot shows the Odoo Contacts form for a contact named 'partner1'. At the top, there is a navigation bar with 'Contacts', 'Contacts', and 'Configuration'. Below this, the breadcrumb 'Contacts / partner1' is visible. A yellow warning message is displayed in a box: 'Duplicate warning: partner **partner2** has the same Email.' The form itself has tabs for 'Individual' and 'Company' (selected). The contact name 'partner1' is at the top. Below it, there are fields for Address (Street, Street 2, Location completion, City, State, ZIP, Country) and Tax ID. To the right, there are fields for Phone, Mobile, Email (filled with 'partner1@test.com'), Website (filled with 'e.g. https://www.odoo.com'), and Legal Form. A '0.00 Invoiced' status is shown in the top right corner.

Fusionner les doublons de contact

Afficher les contacts en vue "liste".

Sélectionner les contacts à fusionner en cochant la case de la première colonne, à gauche.

Cliquer sur le bouton "Action" > Merge (Fusionner)

The screenshot shows the 'Contacts' interface with a table of contacts. Two contacts, 'Test' and 'partner1', are selected. The 'Action' menu is open, and the 'Merge' option is highlighted. The table has columns: Name, Phone, Email, and Industry. The 'Test' contact has email 'partner1@test.com' and industry 'IT/Communication'. The 'partner1' contact has email 'partner1@test.com' and industry 'IT/Communication'.

Name	Phone	Email	Industry
Test		partner1@test.com	IT/Communication
partner1		partner1@test.com	IT/Communication
partner2		partner1@test.com	

Une fenêtre s'ouvre :

The 'Merge' dialog box shows the 'Destination Contact' field set to 'partner1 (10)'. Below it is a table with columns: ID, Display Name, Email, Is a Company, Tax ID, and Country. The table lists two contacts: 'Test' (ID 17) and 'partner1' (ID 10). Both have email 'partner1@test.com' and are marked as 'Is a Company'. The 'Merge Contacts' button is highlighted.

ID	Display Name	Email	Is a Company	Tax ID	Country
17	Test	partner1@test.com	✓		
10	partner1	partner1@test.com	✓		

Sélectionner dans le champ "Destination Contact" le contact qui sera conservé après la fusion.

Cliquer sur le bouton "Merge Contacts".
