

# Contacts : alerte en cas de doublon d'adresse email (v16) et fusionner les doublons

## Alerte doublon d'adresse email

Le module OCA [partner\\_email\\_duplicate\\_warn](#) affiche un message d'alerte quand on encode un nouveau contact avec la même adresse email qu'un contact existant (qu'il soit archivé ou actif).

The screenshot shows the Odoo Contacts form for a contact named 'partner1'. At the top, there is a navigation bar with 'Contacts', 'Contacts', and 'Configuration'. Below this, the breadcrumb 'Contacts / partner1' is visible. A red box highlights a yellow warning message: 'Duplicate warning: partner **partner2** has the same Email.' The form itself is for a 'Company' contact. It includes fields for Address (Street, Street 2, Location completion, City, State, ZIP, Country), Phone, Mobile, Email (partner1@test.com), Website (e.g. https://www.odoo.com), and Legal Form. A 'Tax ID' field is also present. On the right side, there is a '0.00 Invoiced' status and a camera icon with a plus sign.

## Fusionner les doublons de contact

Afficher les contacts en vue "liste".

Sélectionner les contacts à fusionner en cochant la case de la première colonne, à gauche.

Cliquer sur le bouton "Action" > Merge (Fusionner)

The screenshot shows the 'Contacts' interface. At the top, there are tabs for 'Contacts' and 'Configuration'. Below the tabs, there's a search bar and a 'CREATE' button. A status bar indicates '2 selected'. The main table lists contacts with columns for Name, Phone, Email, and Industry. Two contacts are selected: 'Test' and 'partner1'. The 'Action' menu is open, showing options like Export, Archive, Unarchive, Delete, Merge, Send email, Send SMS Text Message, and Grant portal access. The 'Merge' option is highlighted.

Name	Phone	Email	Industry
Test		partner1@test.com	
partner1		partner1@test.com	
partner2		partner1@test.com	

Une fenêtre s'ouvre :

The 'Merge' dialog box is shown. It has a title bar with a close button. The main content area is titled 'MERGE THE FOLLOWING CONTACTS'. Below this, there's a text box explaining that selected contacts will be merged together and documents linked to one of these contacts will be redirected to the destination contact. A 'Destination Contact' field is set to 'partner1 (10)'. Below this is a table with columns: ID, Display Name, Email, Is a Company, Tax ID, and Country. Two contacts are listed: '17 Test' and '10 partner1'. Both have 'Is a Company' checked. At the bottom, there are three buttons: 'MERGE CONTACTS', 'SKIP THESE CONTACTS', and 'CANCEL'.

ID	Display Name	Email	Is a Company	Tax ID	Country
17	Test	partner1@test.com	✓		
10	partner1	partner1@test.com	✓		

Sélectionner dans le champ "Destination Contact" le contact qui sera conservé après la fusion.

Cliquer sur le bouton "Merge Contacts".
