

Gérer les consignes - méthode produit

Le module [pos_container_deposit](#) permet de gérer les consignes en utilisant des produits liés. C'est une alternative à la [méthode des taxes](#).

Cette méthode est simple à utiliser, mais ne permet pas de travailler "consigne incluse" : les prix de ventes sont toujours hors consigne.

Il faut créer un produit de consigne et cocher dans l'onglet Ventes : "Is deposit". Le prix du produit doit être égal au montant de la consigne.

On laisse le champs taxe vide pour que la consigne ne soit pas prise en compte dans le calcul de la TVA.

The screenshot shows the Odoo POS product configuration interface for a product named "deposit". The interface includes a toolbar at the top with various icons and a "DONE" button. The product name is "deposit" with a star icon. Below the name, there are checkboxes for "Can be Sold" (checked), "Can be Purchased", and "Is a Discount?". The "General Information" tab is selected, and the "POINT OF SALE" section is expanded. In this section, the "Is Deposit" checkbox is checked, and a red arrow points to it. Other checkboxes in the "POINT OF SALE" section include "Available in POS" (checked), "To Weigh With Scale" (unchecked), "Mergeable Line" (checked), "Can be Paid for by Meal Vouchers" (unchecked), and "Allowed Membership categories" (unchecked).

Sur le produit consigné, il faut lier le produit de consigne via le champ "Deposit product".
