

# Ajouter des informations de conditionnement

Le module `sale_order_packaging_info` permet d'ajouter des produits de conditionnement, leurs prix et quantités sur le [bon de commande de vente](#) sans que cela impacte le prix de celui-ci.

En effet, l'onglet suivant est ajouté dans le [bon de commande de vente](#). Ces lignes ne sont pas reprises dans les [bons de livraison](#).

Un champ texte est également présent.

The screenshot shows the Odoo Sales Order form for SO8451. The 'Packaging Lines' tab is highlighted with a red arrow. The form includes fields for Customer, Invoice Address, Delivery Address, and Quotation Template. It also has tabs for Order Lines, Packaging Lines, Optional Products, Other Information, and Advance Payments. The Packaging Lines section has a table with columns for Packaging Product, Quantity, Unit Price, and Subtotal. Below the table is a text field for 'Other (Packaging)' and a 'Packaging Total' of 0.00 €.

Il est possible de définir les produits par défaut à afficher dans cet onglet. Pour cela, aller dans la configuration de l'application vente.

Pour pouvoir ajouter ces informations à un template de mail, il faut ajouter en mode debug le code suivant :

```
% if object.sale_order_packaging_line_ids:
</p><p>The following packaging products were used: </p>
<ul>
% for line in object.sale_order_packaging_line_ids:
<li>${line.product_id.display_name} --- Quantity: ${line.product_uom_qty}; Unit Price:
${format_amount(line.price_unit, line.currency_id)}</li>
% endfor
</ul>
Packaging Total: ${format_amount(object.packaging_amount_total, object.currency_id)}
% if object.packaging_other_text:
<p>Other:</p>
<pre>${object.packaging_other_text}</pre>
% endif
% endif
```
